CAREER SUMMARY

- Overall 5 years and 3 months of experience in eCommerce, MLM, and web development, contributing to successful project outcomes and innovative solutions.
- Seeking to leverage expertise in Python, Golang, Docker with relevant 4+ years experience to deliver scalable and efficient solutions in a challenging role.
- I'm eager to apply my expertise and drive for excellence in a collaborative work environment, creating scalable and user-friendly solutions.
- If you're looking for a dedicated and innovative team member, I'd be thrilled to discuss how my skills and experience can contribute to your organization.

EXPERIENCE

Epixel Solutions Pvt Ltd, Palakkad

July 2019 – Present

Senior Software Engineer

- Consistently shared detailed daily and weekly status reports to ensure transparent and effective team communications.
- Spearheaded a point rewards system with expiration policies, incorporating weekly rewards, one-time bonuses, and action-based incentives like download app & login, email verification, quiz scoring, product reviews, and daily check-ins.
- Integrated a 'Buy Together' product selection feature on the shop page using Node.js, enhancing cross-sell opportunities and increasing sales by 20%.
- Collaborated with cross-functional teams to optimize bonus calculations through query optimization and code reuse, enhancing overall system efficiency by 5%.
- Designed and implemented features allowing the admin to change the sponsor while the user was in the holding tank, affecting 10% of users.
- Developed functionality for partial and full order cancellations based on line items after product delivery.
- Migrated CSV data to update user metrics such as sales, BV, and points from an external platform.
- Implemented Cash on Delivery (COD) payment system with an admin feature for approving or rejecting COD orders, which contributes to 10% of total sales.
- Sales data updated upon order delivery, reflecting personal purchases, repurchases, and those of directly referred customers.
- Personal incentive bonus calculated based on the user's personal sales within specific ranges.
- Speed Timeline Chart: Developed a speed timeline chart with Node.js to track personal sales progress, enhancing real-time data visualization and increasing customer satisfaction by 15%.
- Created an active status criterion for distributors, requiring a personal annual purchase of at least 1 ton to remain active, with status automatically updated using Celery tasks.
- Successfully Dockerized projects and existing applications, enabling consistent deployment environments and simplifying configuration management, which improved the development lifecycle and deployment reliability.
- Successfully led teams of 3-4 employees across 5 projects, showcasing effective leadership.
